

ARIZONA CONNECTED

BREAKING BROADBAND BARRIERS

ARIZONA | ADOT
COMMERCE AUTHORITY

eX² Technology, in partnership with Arizona Department of Transportation (ADOT) and Arizona Commerce Authority (ACA), is working to expand broadband access and improve digital equity throughout Arizona. As ACA/ADOT's exclusive Middle-Mile Fiber Infrastructure Operations, Maintenance and Commercialization partner, eX² is marketing newly deployed conduit and dark fiber as well as offering wireless development opportunities along Arizona's I-17, I-19 and I-40W corridors.

This 100% underground infrastructure is available on an open access basis and serves to reduce barriers to entry for carriers, internet service providers, communities and more by providing the infrastructure necessary to connect to homes, businesses, community anchor institutions and beyond. These assets give carriers and service providers alternate routes to key Arizona markets, can provide redundancy and offer connections to data centers and other colocation facilities. The middle-mile network also delivers wireless service providers a green field development opportunity that presents a streamlined permitting approach to build small cell and macro towers or add wireless backhaul to existing infrastructure.

For a detailed route map, rates, terms and conditions or to discuss connection opportunities, contact us today. And, don't forget to ask about future conduit and fiber infrastructure planned along Arizona's I-10 and I-8 corridors!

HOW CAN YOUR ORGANIZATION BENEFIT?

Connection to secure, 100% underground open access right of way along Arizona's I-17, I-19 & I-40W

Ability to add customized access points, colocation or network connectivity

Minimized permitting & regulatory processes

Accelerated speed to market & return on investment

Reduced operational costs with shared maintenance & relocation expenses

Opportunity to expand broadband access and improve digital equity

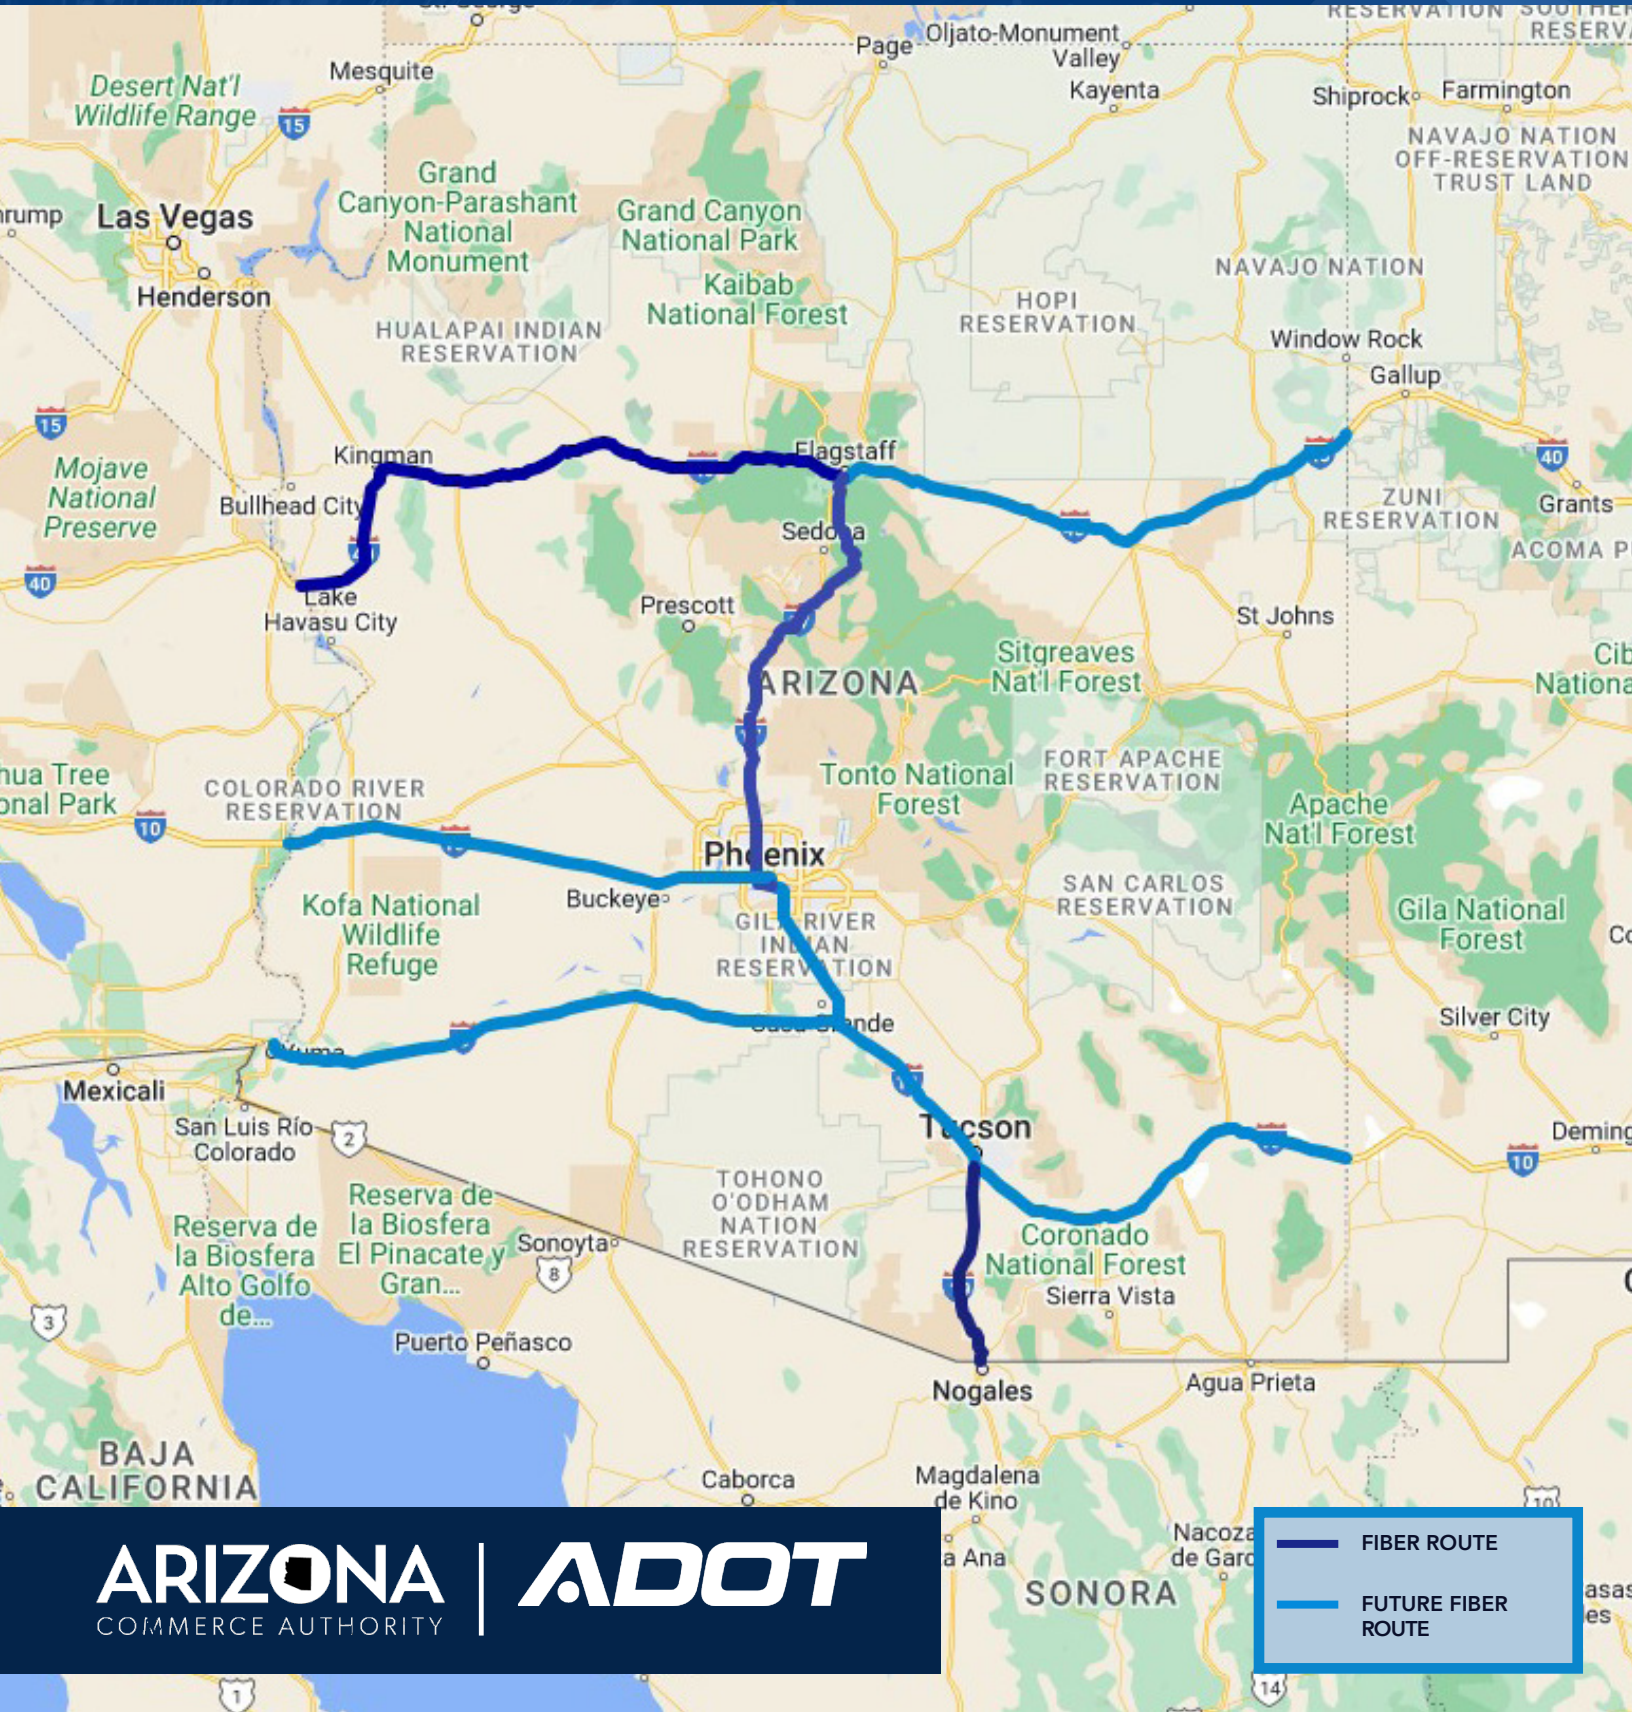

TRANSFORMING
AMERICA'S INFRASTRUCTURE
ONE PARTNERSHIP AT A TIME™
