

# A Better Way to Broadband

## Unique Opportunities to Close the Digital Divide in America's Desert Southwest

# SunZia

eX<sup>2</sup> Technology, in partnership with SunZia Transmission, is offering access to 500 miles of available dark fiber and other communications infrastructure between Albuquerque and Phoenix. As SunZia's exclusive dark fiber commercialization partner, eX<sup>2</sup> is offering this infrastructure on an open-access, vendor-neutral basis. With the ability to add customized access points along the fiber route, the network offers carriers and service providers an ideal option for adding diversity and redundancy to their network infrastructures.

As currently designed and ready for use in 2025, the planned fiber route passes approximately 15 communities within 40 miles of the route, providing a unique and cost-friendly opportunity to expand broadband services to underserved areas in the Desert Southwest.

Now's the time to reserve dark fiber and discuss preferred access and co-location requirements.

For a detailed route map, rates, terms and conditions or to discuss connection opportunities, contact us today!

### HOW CAN YOUR COMPANY BENEFIT?

Connection to a 500-mile, highly secure, open-access fiber route between Albuquerque and Phoenix

Ability to add customized access points, colocation or network connectivity

Accelerated speed to market for faster return on investment

Minimized permitting & regulatory processes

Reduced operational costs with shared maintenance & relocation expenses
